Work

March – May 2017 **Full Stack Developer**
Co. Durham
Plan for Probate (North) Ltd.
- Developed an online portal to store client information and track payments
- Employed Agile methodologies to keep the owners updated and work to the evolving requirements
- Technologies Used: Java, JSP, Bootstrap, SQL, Javascript, Google Cloud Services

July – Oct 2016 **Java Desktop Application Programmer**
Sunderland
E. Hall Tripe & Poultry Ltd.
- Worked from a brief to develop a logistics system for the factory
- The program tracked orders and repeat orders, creating lists of products for the delivery drivers
- The program organised routing for the deliveries, which was previously done by hand
- Technologies Used: Java, Swing, SQL

2013 – Present **Desktop Application Developer**
Newcastle
Lowes Financial Management
- Created and maintained various tools which analyse financial products
- The tools produce graphs and data which are used in literature distributed to clients and have been published in online articles by Lowes
- Technologies Used: Java, SQL, Excel, VBA

Student Groups

President of Code Wars society. Involved in DU Robot Wars team. Actively involved with ShellShock! Improvised Comedy. Elected to sit on Societies Committee which governs other student groups. Elected as Course Rep and Co-Chair of the Student-Staff Committee.

Portfolio

The screenshot shows a web browser window with the URL 'peter-collins.appspot.com/clients/view-'. The page title is 'Plan for Probate Web Portal'. It displays a 'Client View (ID: 1002)' for 'Steven Lowes'. The form includes fields for 'Address' (95 Wakenshaw Road, Gillesgate, Durham), 'Phone Number' (07736105946), 'Mobile Number' (07378438686), 'Email Address' (stevenlowes@gmail.com), and 'Interest Expressed' (Product: LPA, Interest Level: Unknown). There are 'Edit Client' and 'Delete Client' buttons.

Plan For Probate Web Portal (May 2017)

Plan For Probate's internal web portal. Tracks clients, and tasks currently in progress. Allows for file upload and storage for important documents. Secured using Google Login, and Database encrypted to comply with GDPR. Used by the company to store and manage all ongoing tasks and client information. The web portal has replaced the previous system which used index cards to track their clients. The web portal significantly decreased the time spent on admin and number of errors/missed appointments.

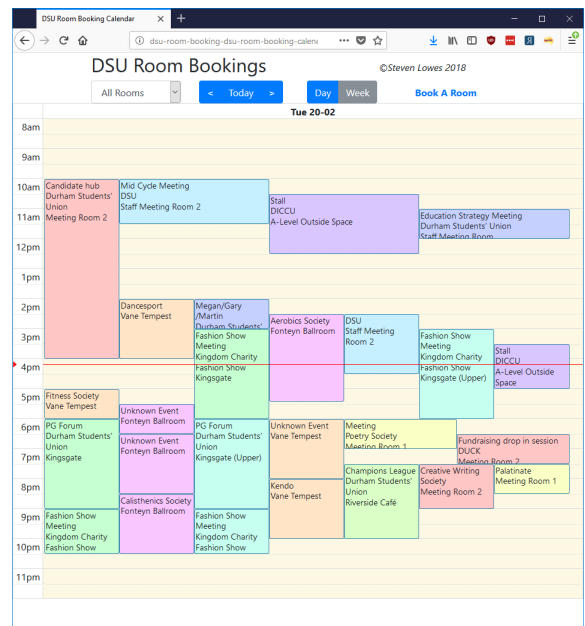

Technologies Used: Java, SQL (MySQL), JSP, Bootstrap, Javascript, Google Cloud Platform

The screenshot shows a web browser window with the title 'Patient Information Portal'. The page is titled 'Patient Edit - ID 2'. It contains a form for patient information, including 'First Name', 'Surname', 'Date of Birth', 'Phone Number', 'Practice', 'Consultant', 'Risk Category', 'Address', and 'NHS First Name'. There are also sections for 'Prescribed Treatment' (Counselling) and 'Prescribed Medicine' (Diazepam, Metastatin). Buttons for 'Save Patient' and 'Delete Patient' are at the bottom.

Patient Information Portal (Feb 2018)

University Assignment. Focussed on creating GUIs following principles of Human-Computer Interaction. Used the opportunity to learn JavaFX to replace Swing. Backed by a remote MySQL Database and a DAO layer. The mark for this assignment is still pending.

Technologies Used: SQL (MySQL), Java, JavaFX

DSUrooms.com (Jan 2018)

Created for Societies Committee, to show when rooms in the Students' Union were booked. Received very positive feedback from Student Groups, as previously there was no way to know which rooms were booked. Not yet in full release, but in use by a small group of executive committees.

Technologies Used: NodeJS, FullCalendar, Javascript, JQuery, RedHat Openshift

Autocall Backtester (March 2016)

Created for Lowes Financial Management. Tests a financial product to see how it would have performed historically. This tool allowed the analysis to be performed where previously it was too time consuming. The graphs produced are used in the official product literature and online. The tool also informed the creation of new products, where backtesting revealed them to perform better than expected.

Technologies Used: Java, Excel
